KME Architectural Solutions

Building Envelopes in Metal

*Our teams know a lot about using metals in buildings, as we have been supporting architects and users for a long time in planning and building metal façades and roofs. As a **KME** Group company, we have the experience of supporting countless projects throughout the world, and the competence of our engineers is unrivalled. Working closely with our clients, we now offer a package of services covering everything from planning and development of façades and roofs in every metal you can think of right through to 'turn-key' realisation.*

Façades and roofs in any metal!

1. We advise you and your staff. Competent!

Our advice services cover the whole range from preliminary planning of the roof and façade to design and construction planning through to supervising construction. We supply analyses, testable structural calculations, specifications, 3D planning and visualisation, rendering, technical tests, documentary proofs, certificates and product data sheets – our advice is comprehensive!

2. We develop your façade project for you. Committed!

Innovative applications and system solutions, installation simplifications, aesthetic or functional optimisations – you give us your requirements, we develop!

3. **We plan for you. Professional!**

Complete façade and roof projects, carried out systematically and professionally in every detail – that's the way we plan!

4. **We supply your materials. Complete!**

Any suitable metal with the relevant substructure, the proper fixtures and all accessories in many different surfaces, textures, forms, material strengths and dimensions – we supply it all!

5. **We see to your prefabrication. Tailor-made!**

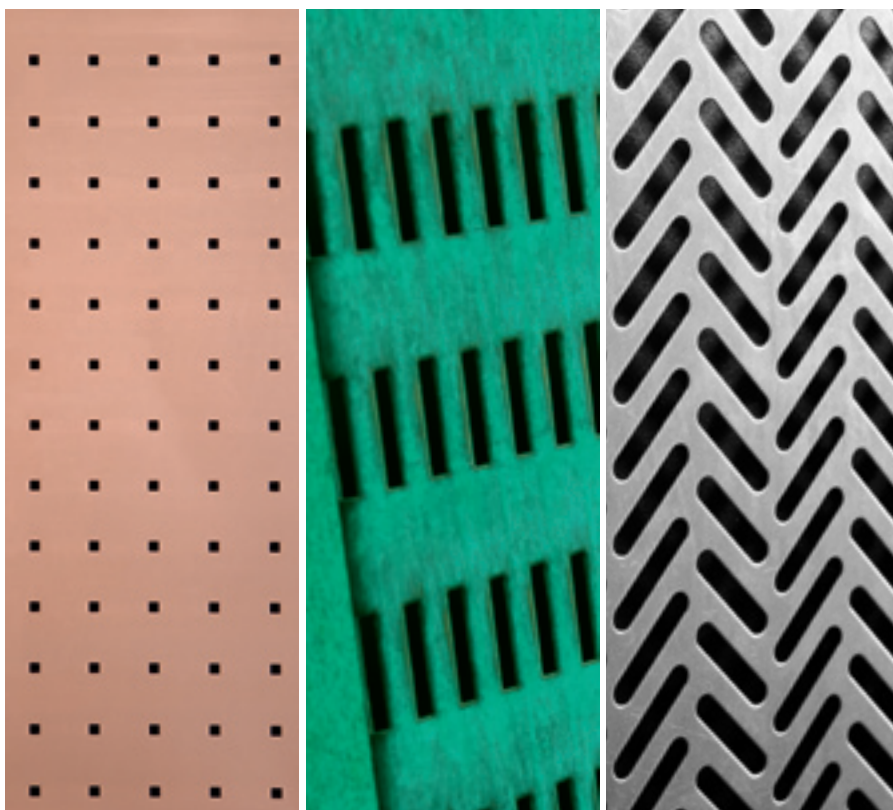

Complete systems for façades and roofs, tailor-made and ready for installation, from a simple plate to a panel or façade element – we can make it, reliably and in intensive consultation with you!

6. **We support you on site. In every way!**

We are there while processing is being done and cooperate closely with your teams until completion, guaranteeing qualified supervision – what we give support to turns out well!

7. **We do your installation. Reliable!**

We undertake professional and punctual delivery and assembly of façades and roofs right up to the ‘turn-key’ solution – we do full installation!
