# TECPANELS

THE ART OF VOLUME

TECPANELS is proud to introduce a new generation of wall covering panels for the home and for commercial premises which are easy to purchase and install.

## PRODUCT

TECPANELS decorative panels are manufactured from wooden fibre panel with a special resin which is characterised by great physical and mechanical strength and water resistance. Digital control technology allows us to cut these panels with precision to achieve ornamental, volume and geometric effects which produce a spectacular final product. The pieces are supplied in boxes of three or four 60 x 60 cm panels. The panels are easy to install and can be mounted with basic tools. The pieces are supplied in boxes of three or four 60 x 60 cm panels. They can also be supplied in other formats on order.

## FINISHES

We offer the finishes shown in the margin. A white background is the ideal finish for clients who wish to paint their panels, whilst the rest of the finishes allow for the direct installation of the finished panel.

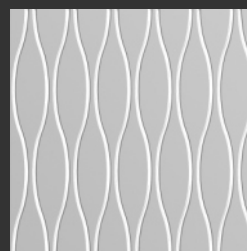

## APPLICATIONS

Unlike other decorative panels which are meant only for commercial premises, the TECPANEL range is designed for use in the home as well, given how easy it is to mount the panels and their adapted design. Apart from covering walls, they can be used to decorate ceilings, to cover doors and to build furniture, bars and dividing walls. This product is also ideal for reforming and refurbishing existing premises as it can be installed on top of existing walls.

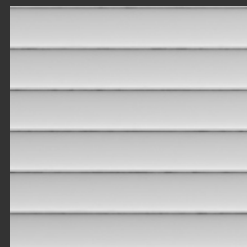

## SPECIAL PROJECTS

As well as the panels and formats shown on this web page, we can work on other designs alongside our clients, as well as cutting the same panels in different formats from those shown here. (A 120 x 240 cm panel, for example, to cover a wall with no joints). Please ask for a quote if you would like us to work on a special project.
