Simply the best

Mats for the world of martial arts

Over many years almost everyone involved in martial arts has got to know all about the high quality of the BSW Tatami. BSW Tatamis are just as much a part of international competitions as they are of regular training in the judo club. Already back in 1972, for the

Olympic Games in Munich, BSW developed judo mats with revolutionary new properties. Since then they have set international standards and today development work still continues unabated. Working together with our partners we have turned BSW Tatami

into the best selling judo mat world-wide. The acknowledged quality, our delivery service and the excellent value for money mean that since 1972 we have sold over two million square metres of matting. BSW Tatami – the ultimate range for the world of martial arts.

Olympic champions and world champions have celebrated their championship successes on BSW Tatami:

Olympic Games:

Munich 1972, Montreal 1976, Los Angeles 1984, Barcelona 1992

World Championships:

Paris 1979, 1982, 1997, Canada 1986, 1993, Barcelona 1991, Basel 2002

BSW Tatami: recommended by the International Judo Federation.

Arnold Schwarzenegger,
Classic Columbus / Ohio 2001

All values are average values

BSW Tatami Professional

For
national and international competitions

Quality Mark
E 215
Bonded foam core with specially formulated damping characteristics.

Density
240 kg / m³

Force Reduction
DIN 18032, Part 2 and DIN 7926
40 mm standard thickness = approx. 75%

BSW Tatami Training

For
training – lesser thicknesses upon inquiry

Quality Mark
E 200
Bonded foam core with specially formulated damping characteristics.

Density
200 kg / m³

Force Reduction
DIN 18032, Part 2 and DIN 7926
40 mm standard thickness = approx. 78%

BSW Tatami Special

For
special requirements, for example Karate

Quality Mark
E 260 or E 300
Bonded foam core with specially formulated damping characteristics.

Density
E 260: 260 kg / m³
E 300: 300 kg / m³

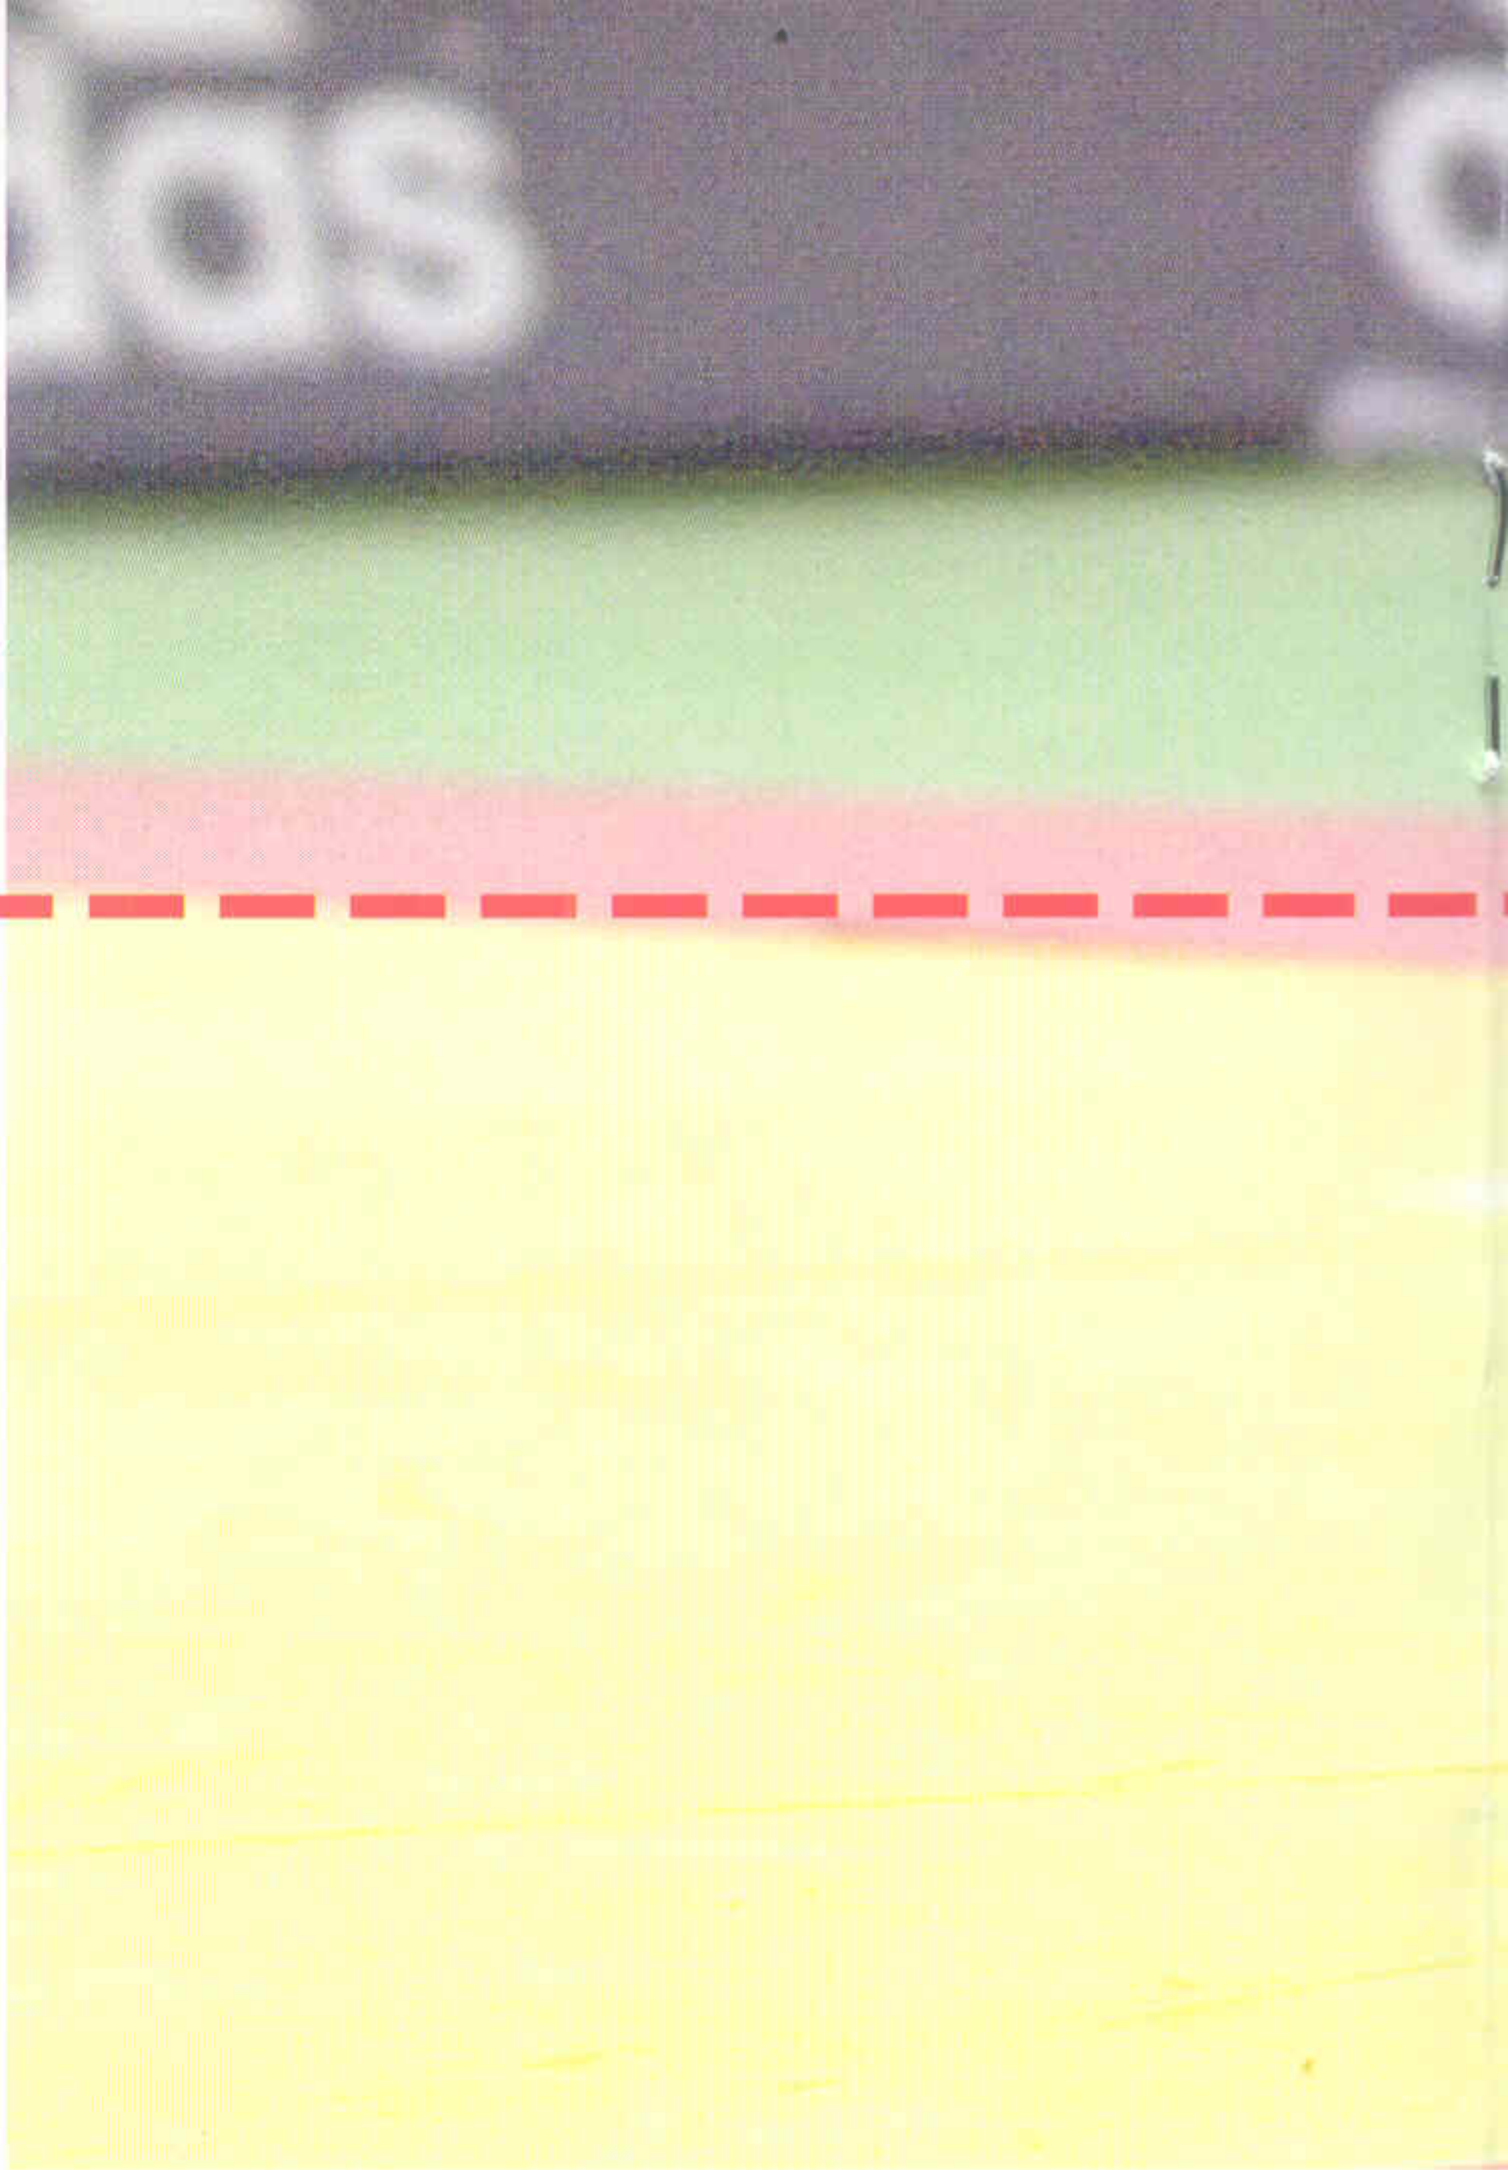

Force Reduction
E 260: DIN 18032, Part 2 and DIN 7926
40 mm standard thickness = approx. 73%
E 300: DIN 18032, Part 2 and DIN 7926
40 mm standard thickness = approx. 71%

Dimensions

Length:
2.000, 1.000 und 1.500 mm =
international standard

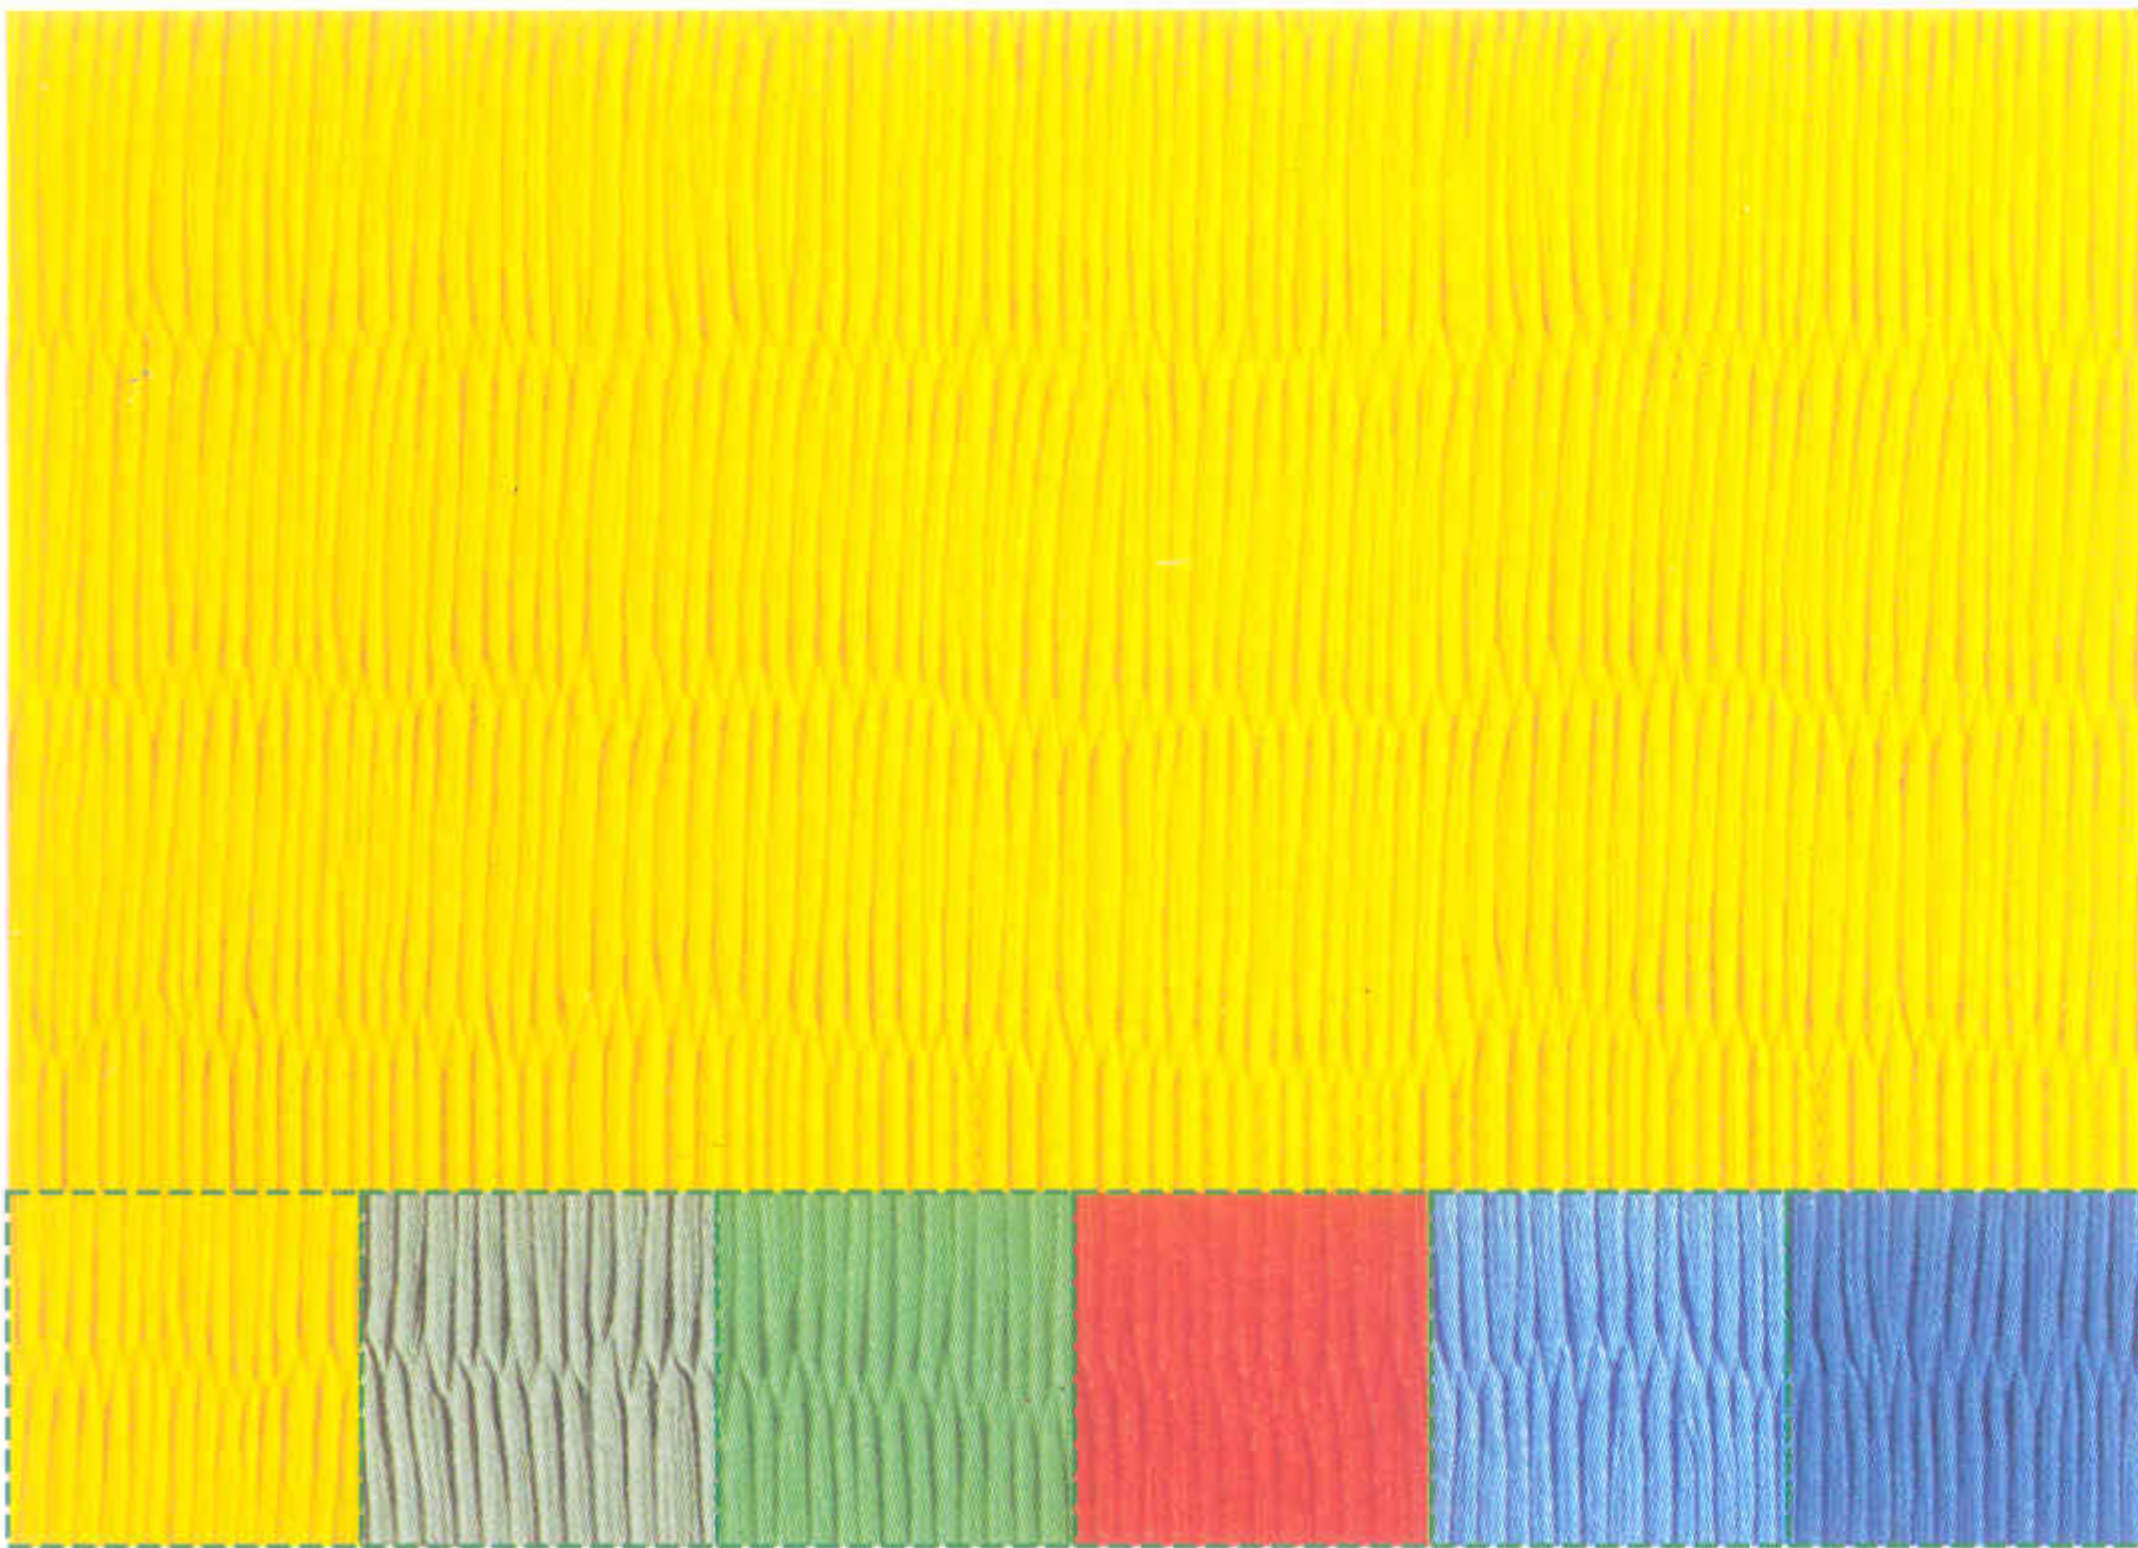

Width:
1.000 mm =
international standard, other sizes upon inquiry

Thickness:
20, 25, 30, 40, 50 and 60 mm
40 mm = international standard

The Material Coverings

BSW Tatami Vinyl

Vinyl surface with rice straw structure, base fabric polyester.
Especially suitable for judo.

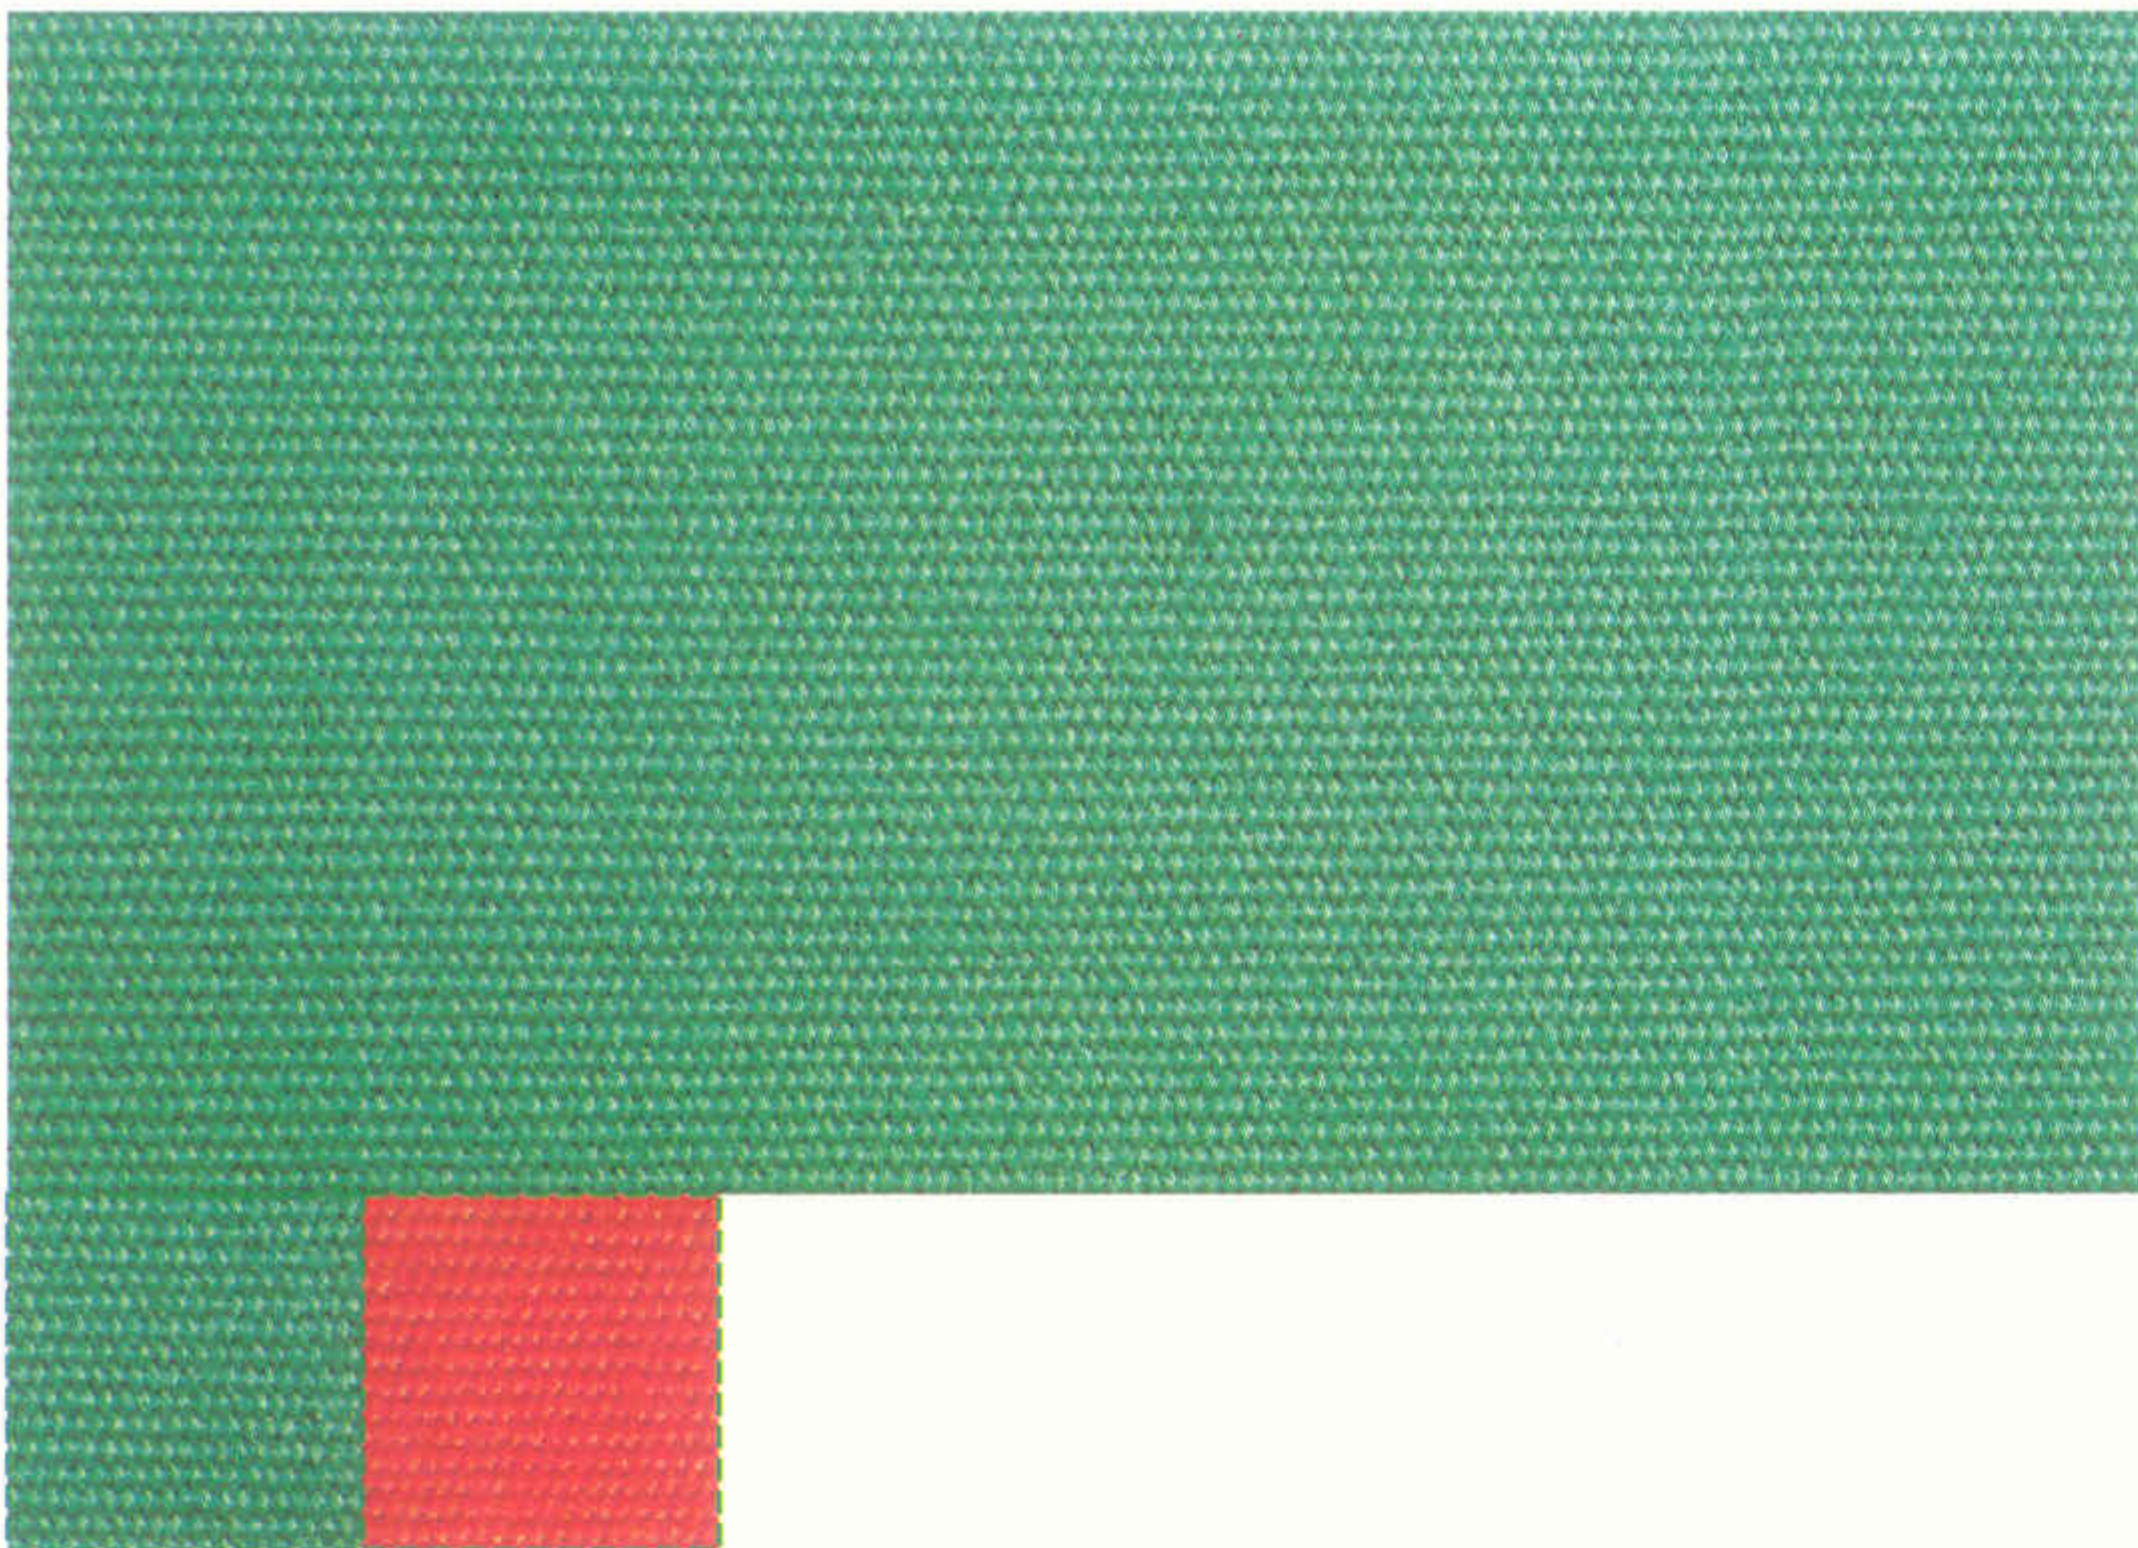

Tensile Strength
DIN 53354 - 2.480 / 2.420 N / 5 cm

Tear Resistance
DIN 53363 - 310 / 420 N

Colours
yellow, green, light green, red, blue, dark blue

5 years tear resistance guarantee

BSW Tatami Cotton

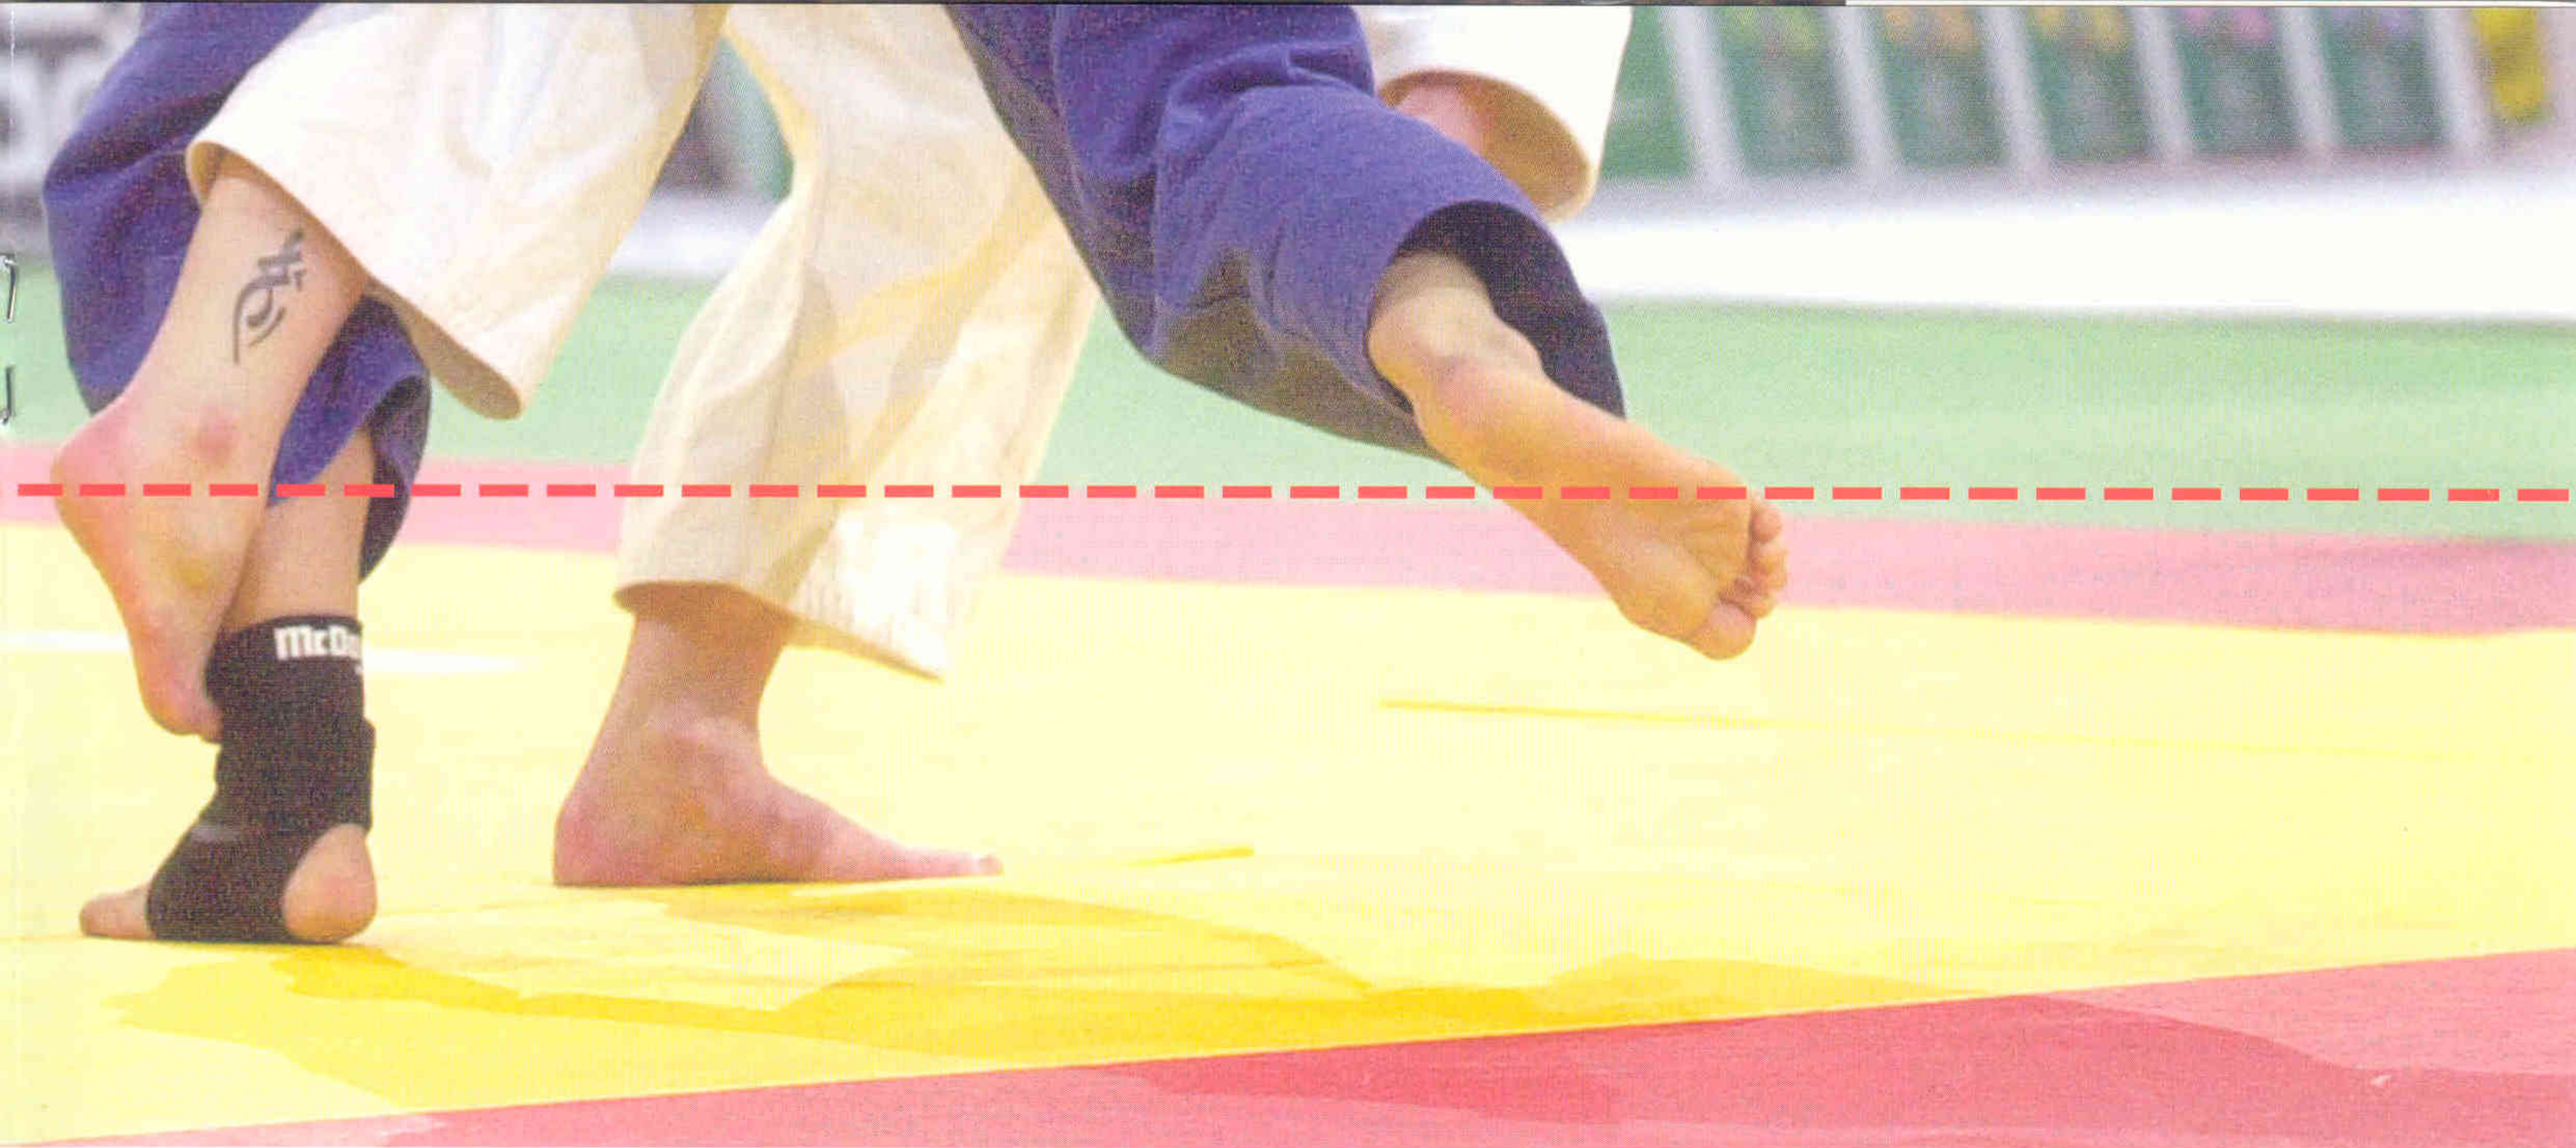

100% cotton surface – does not stain with sweat.
Especially suitable for Aikido.

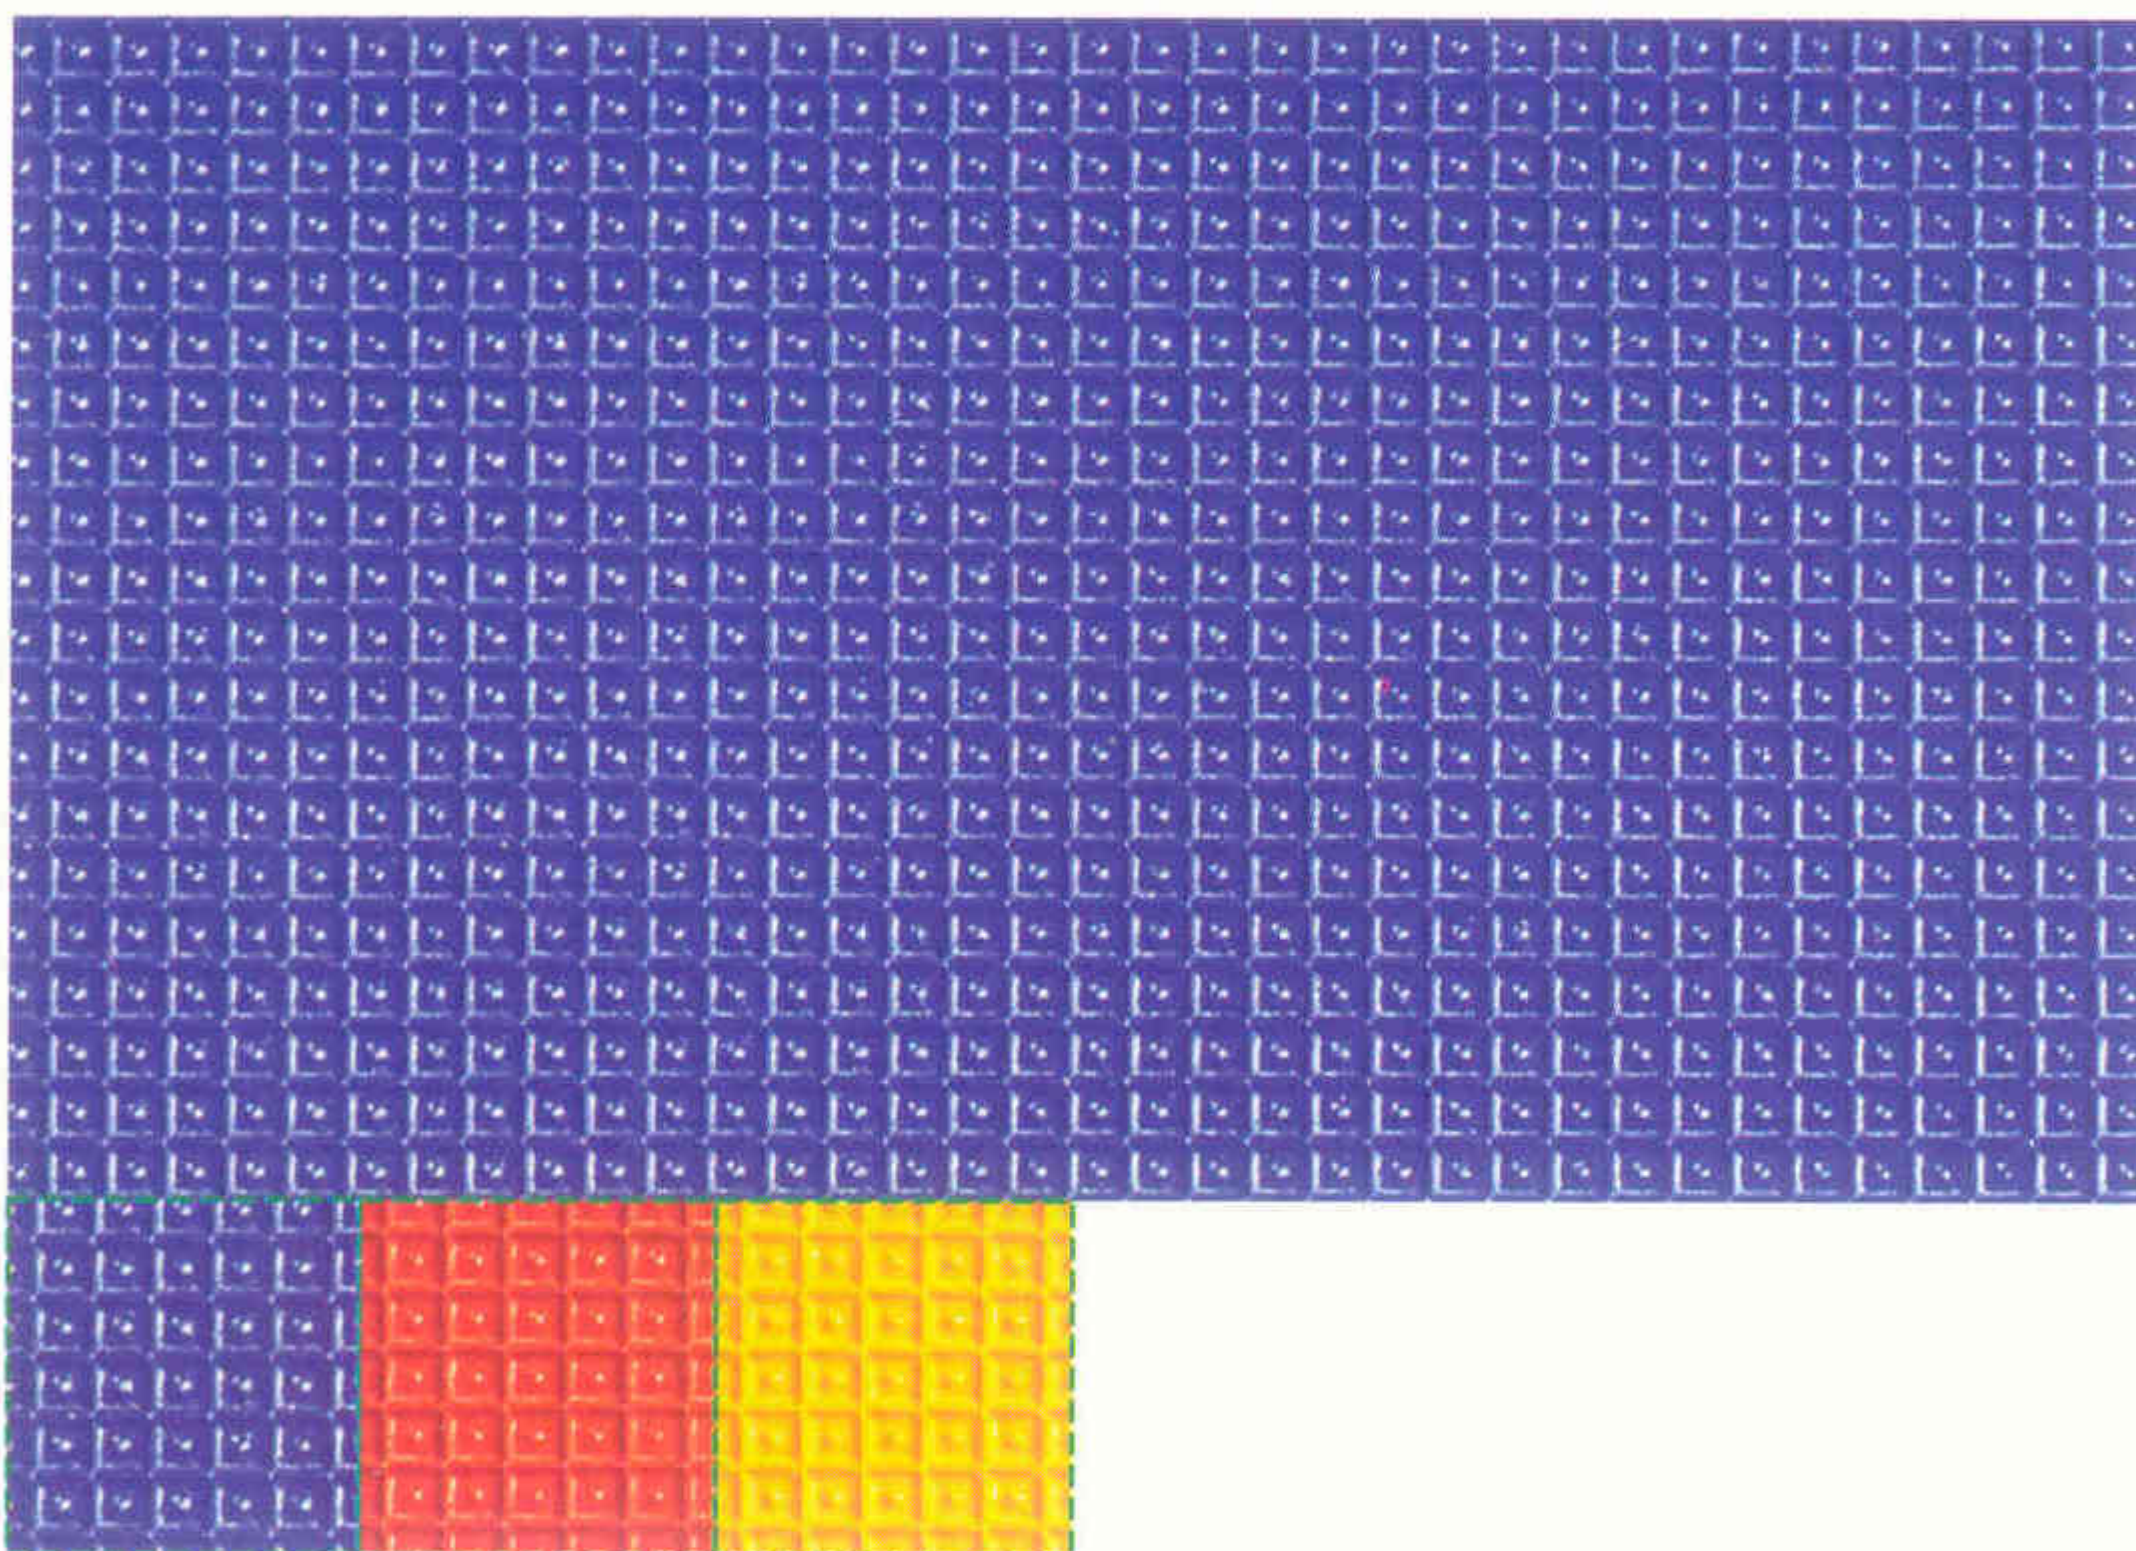

Weight
408 g / m³

Textile Density
24f* 12d-Nm 24 / 2* 8 per cm

Colours
green, red

BSW Tatami Gym Cover

Surface material: structured PVC, anti-slip, base fabric polyester.

Especially suitable for Karate, Taekwondo.

Tensile Strength

DIN 53354 – 2.000 / 2.500 N / 5 cm

Tear Resistance

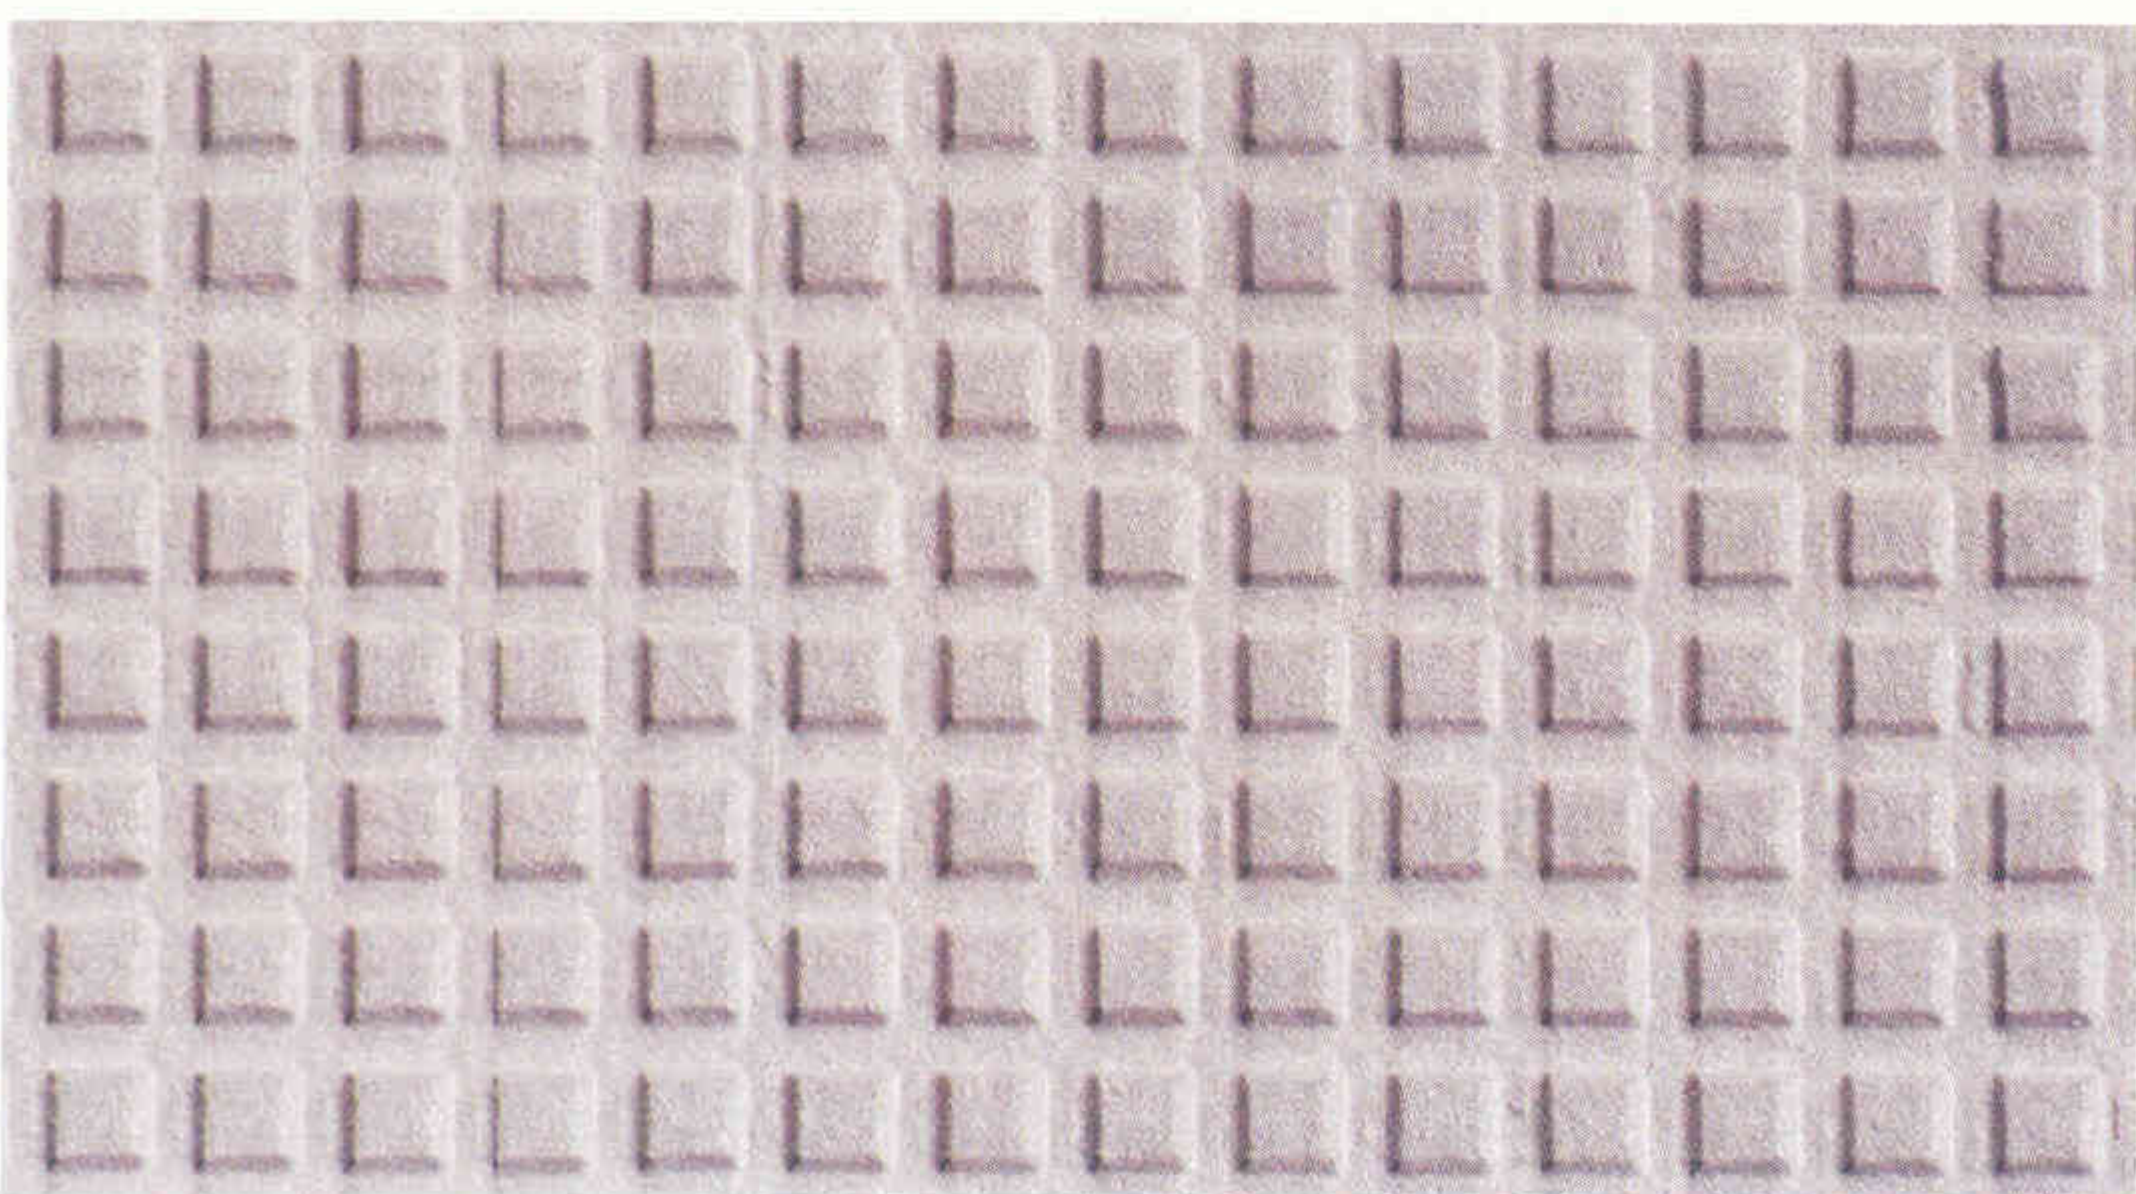

DIN 53363 – 200 N

Colours

blue, red, yellow

5 years tears resistance guarantee

BSW Tatami Anti Slip

Specially developed to give improved anti-slip characteristics and abrasion values.

Latex Waffle Structure

Slip resistance according to DIN 53354

BSW Tatami Anti Slip – 24,85 μ S.

Other anti-slip materials – 18,59 μ S

Abrasion Test

Test parameters – size of abrasion grain: P 100

Test velocity: 22 m / min; test duration: 60 seconds

Result

Material loss through abrasion:

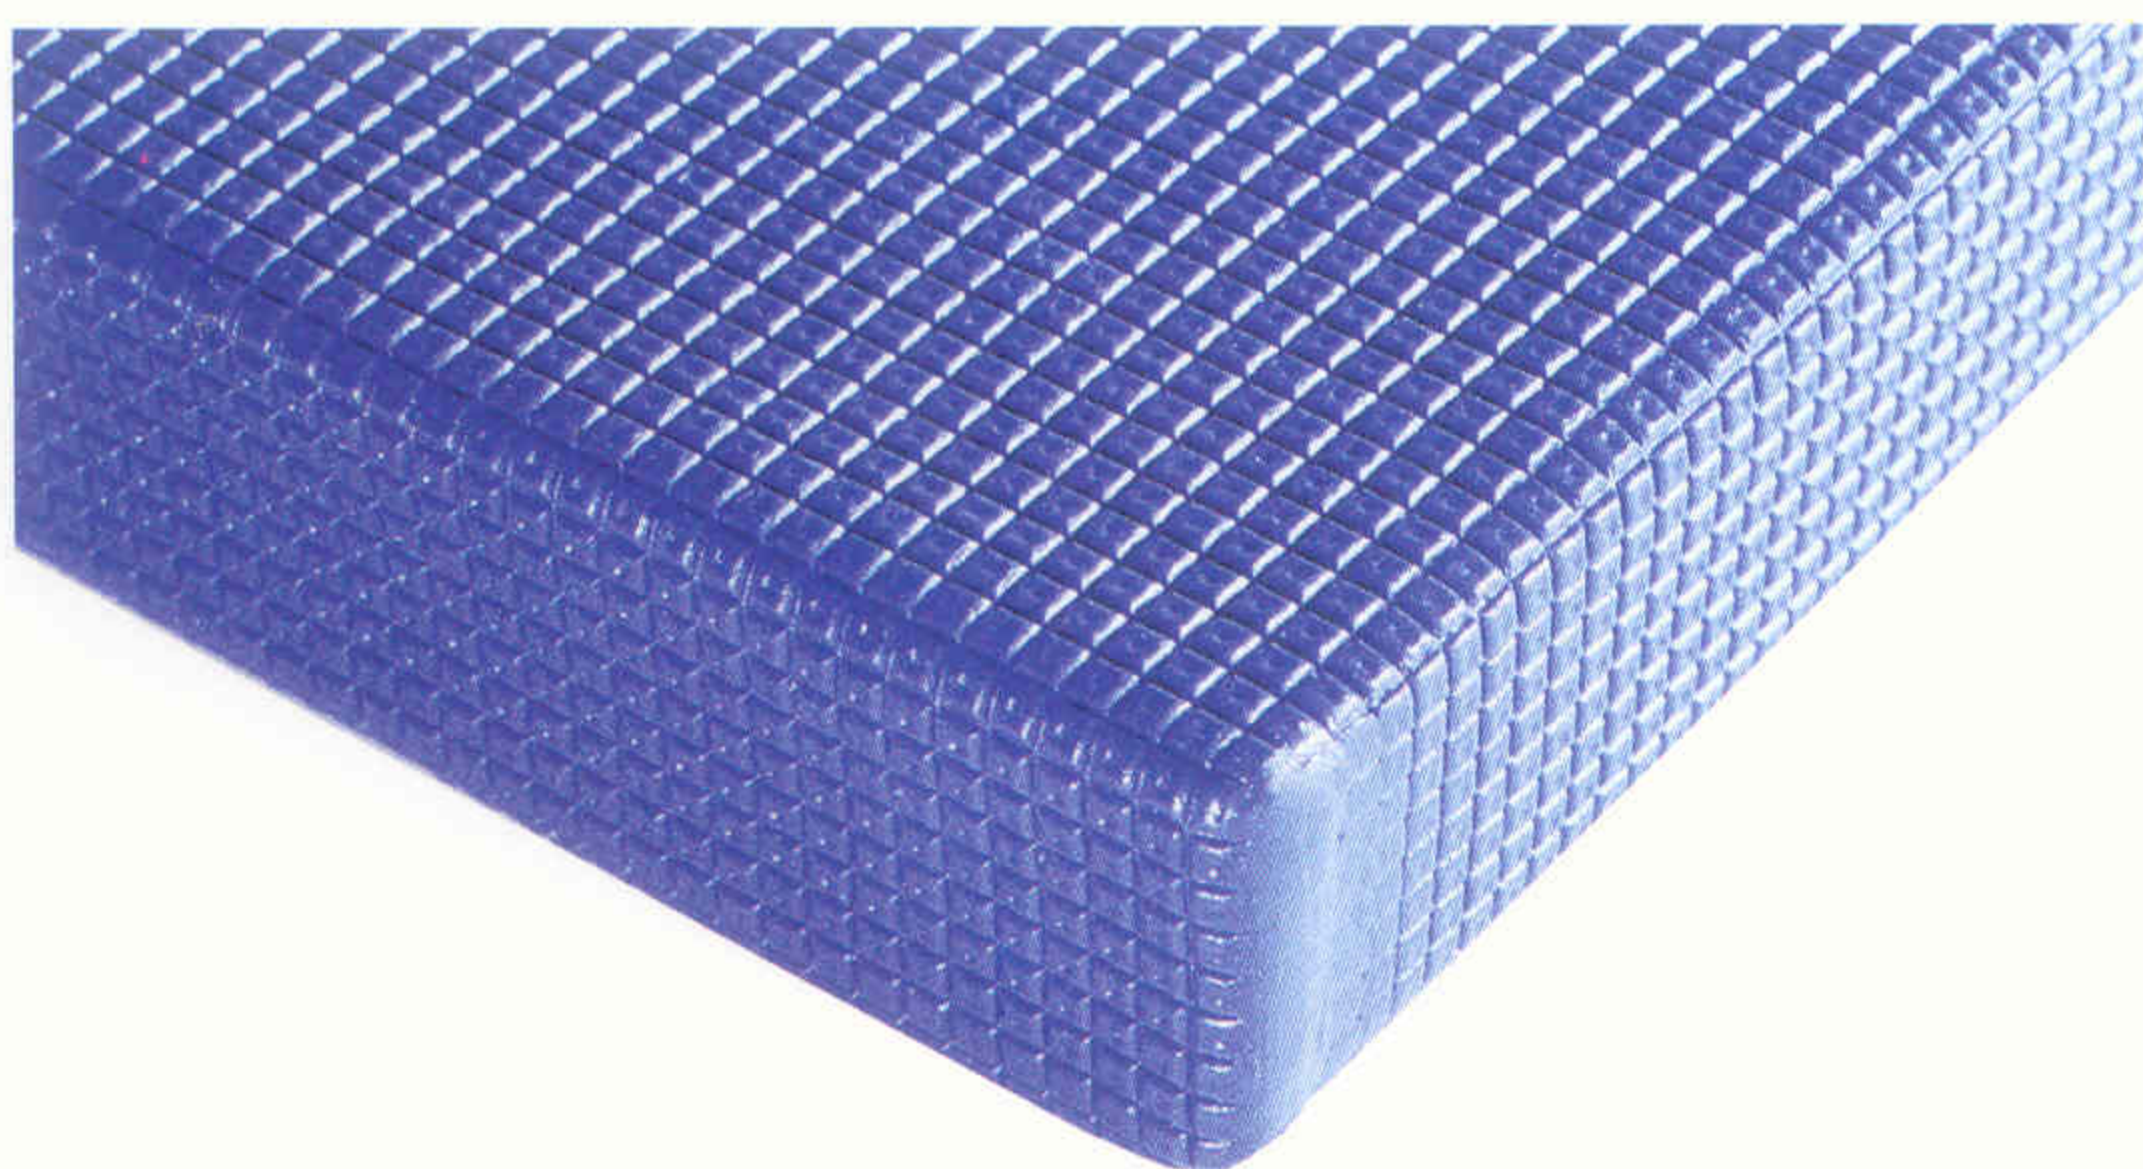

BSW Tatami Anti Slip – 0,7g

Other anti-slip materials – 1,4g

BSW Special Mats

BSW Cardio and Striking Arts Mat

For Cardio, Kick Boxing, Taekwondo and Karate. The mat offers both a high level of slip resistance as well as being sufficiently flexible to soften a fall. The special covering material enables the mat to also be used with sports shoes.

Dimensions

2.000 x 1.000 x 25 mm

Quality Mark

E 215

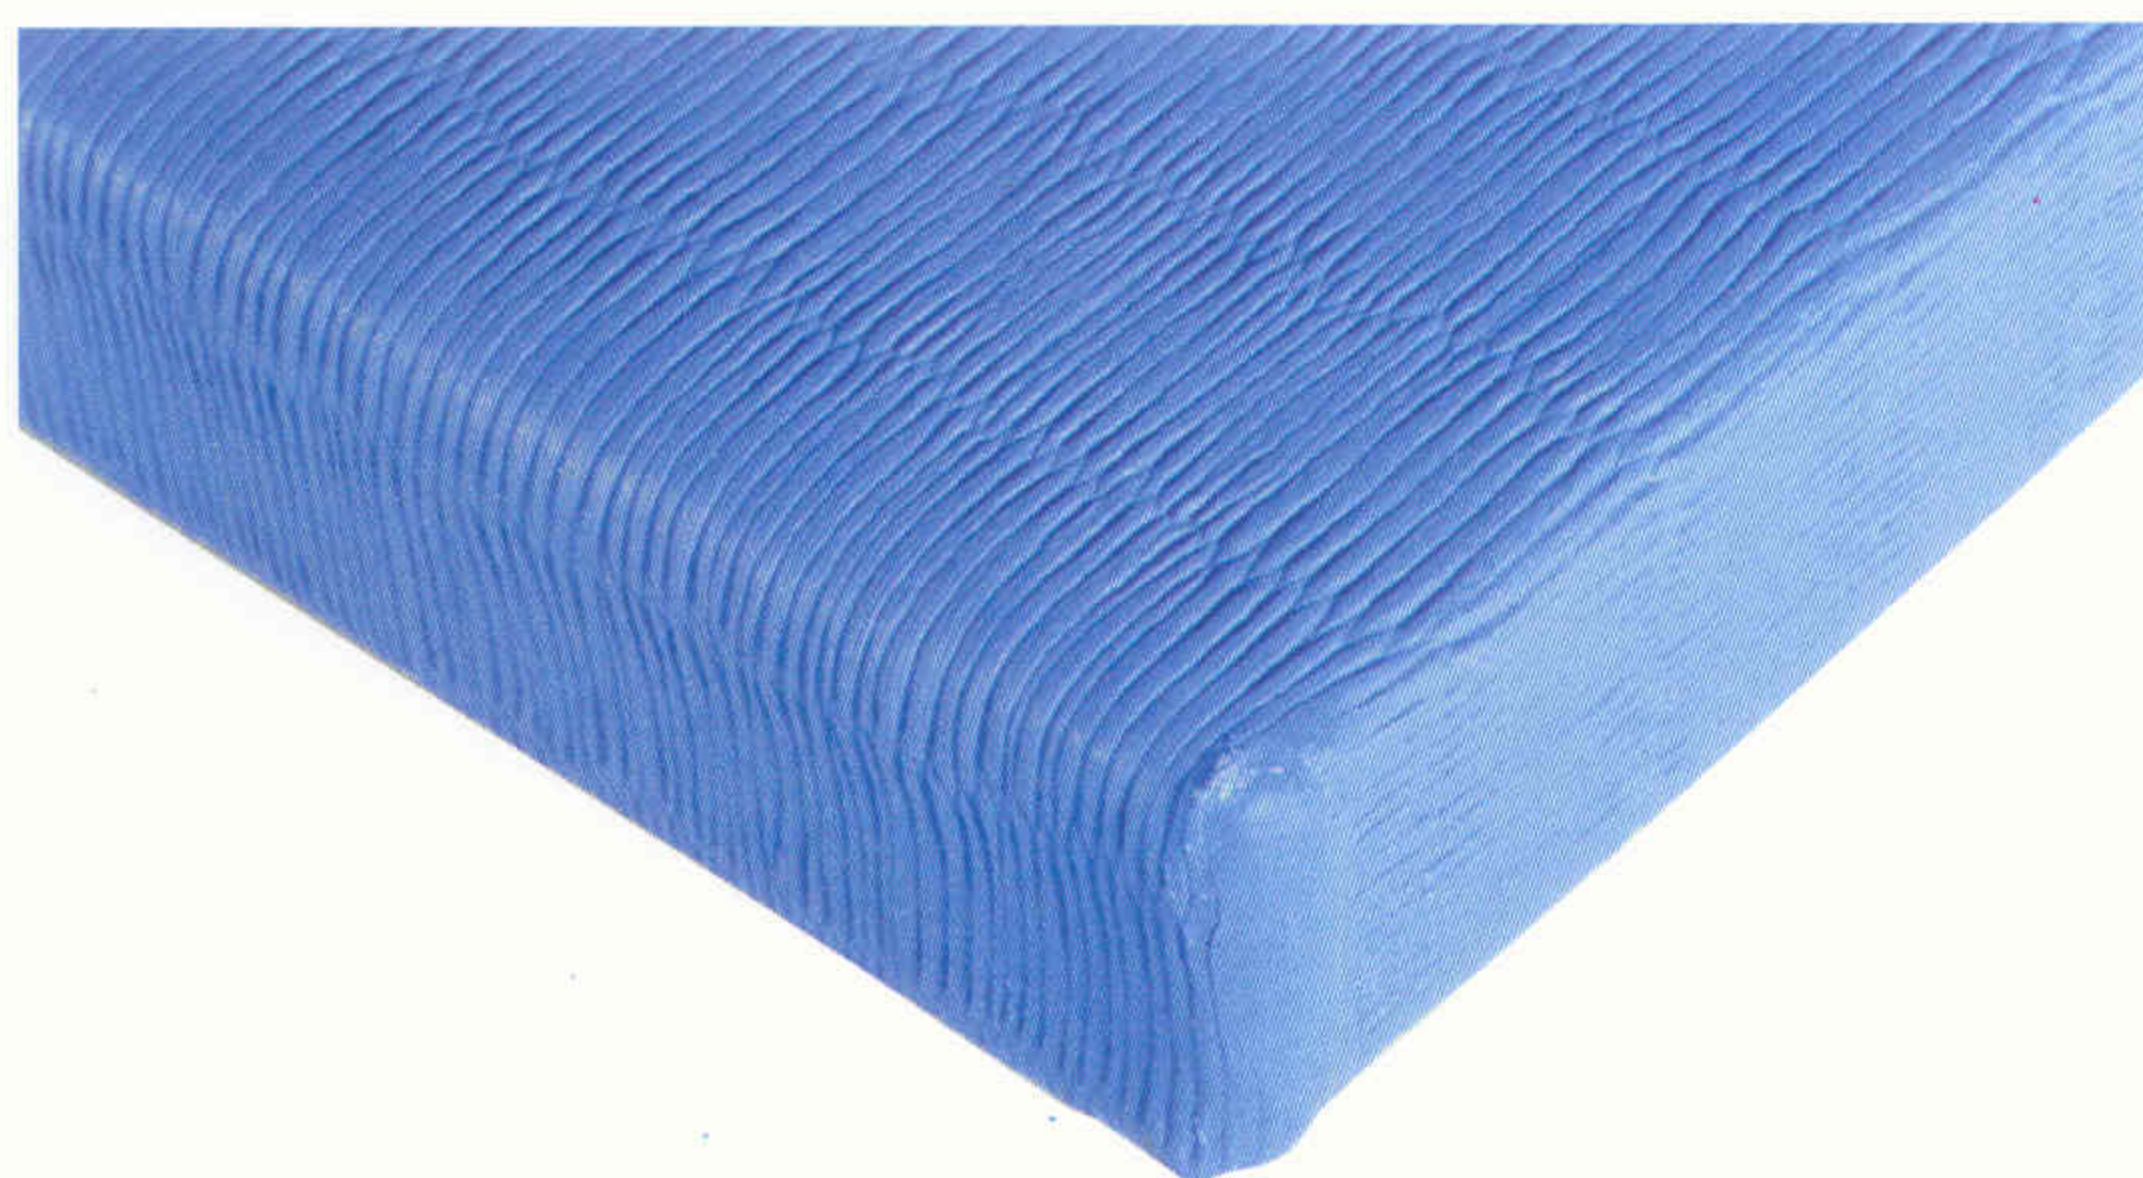

Density

240 kg / m³

Covering Material

BSW Gymcover

BSW Combo Mat

For the combination of step techniques and judo. The mat offers both a high level of slip resistance as well as being sufficiently flexible to soften a fall.

Dimensions

2.000 x 1.000 x 25 mm

Quality Mark

E 215

Density

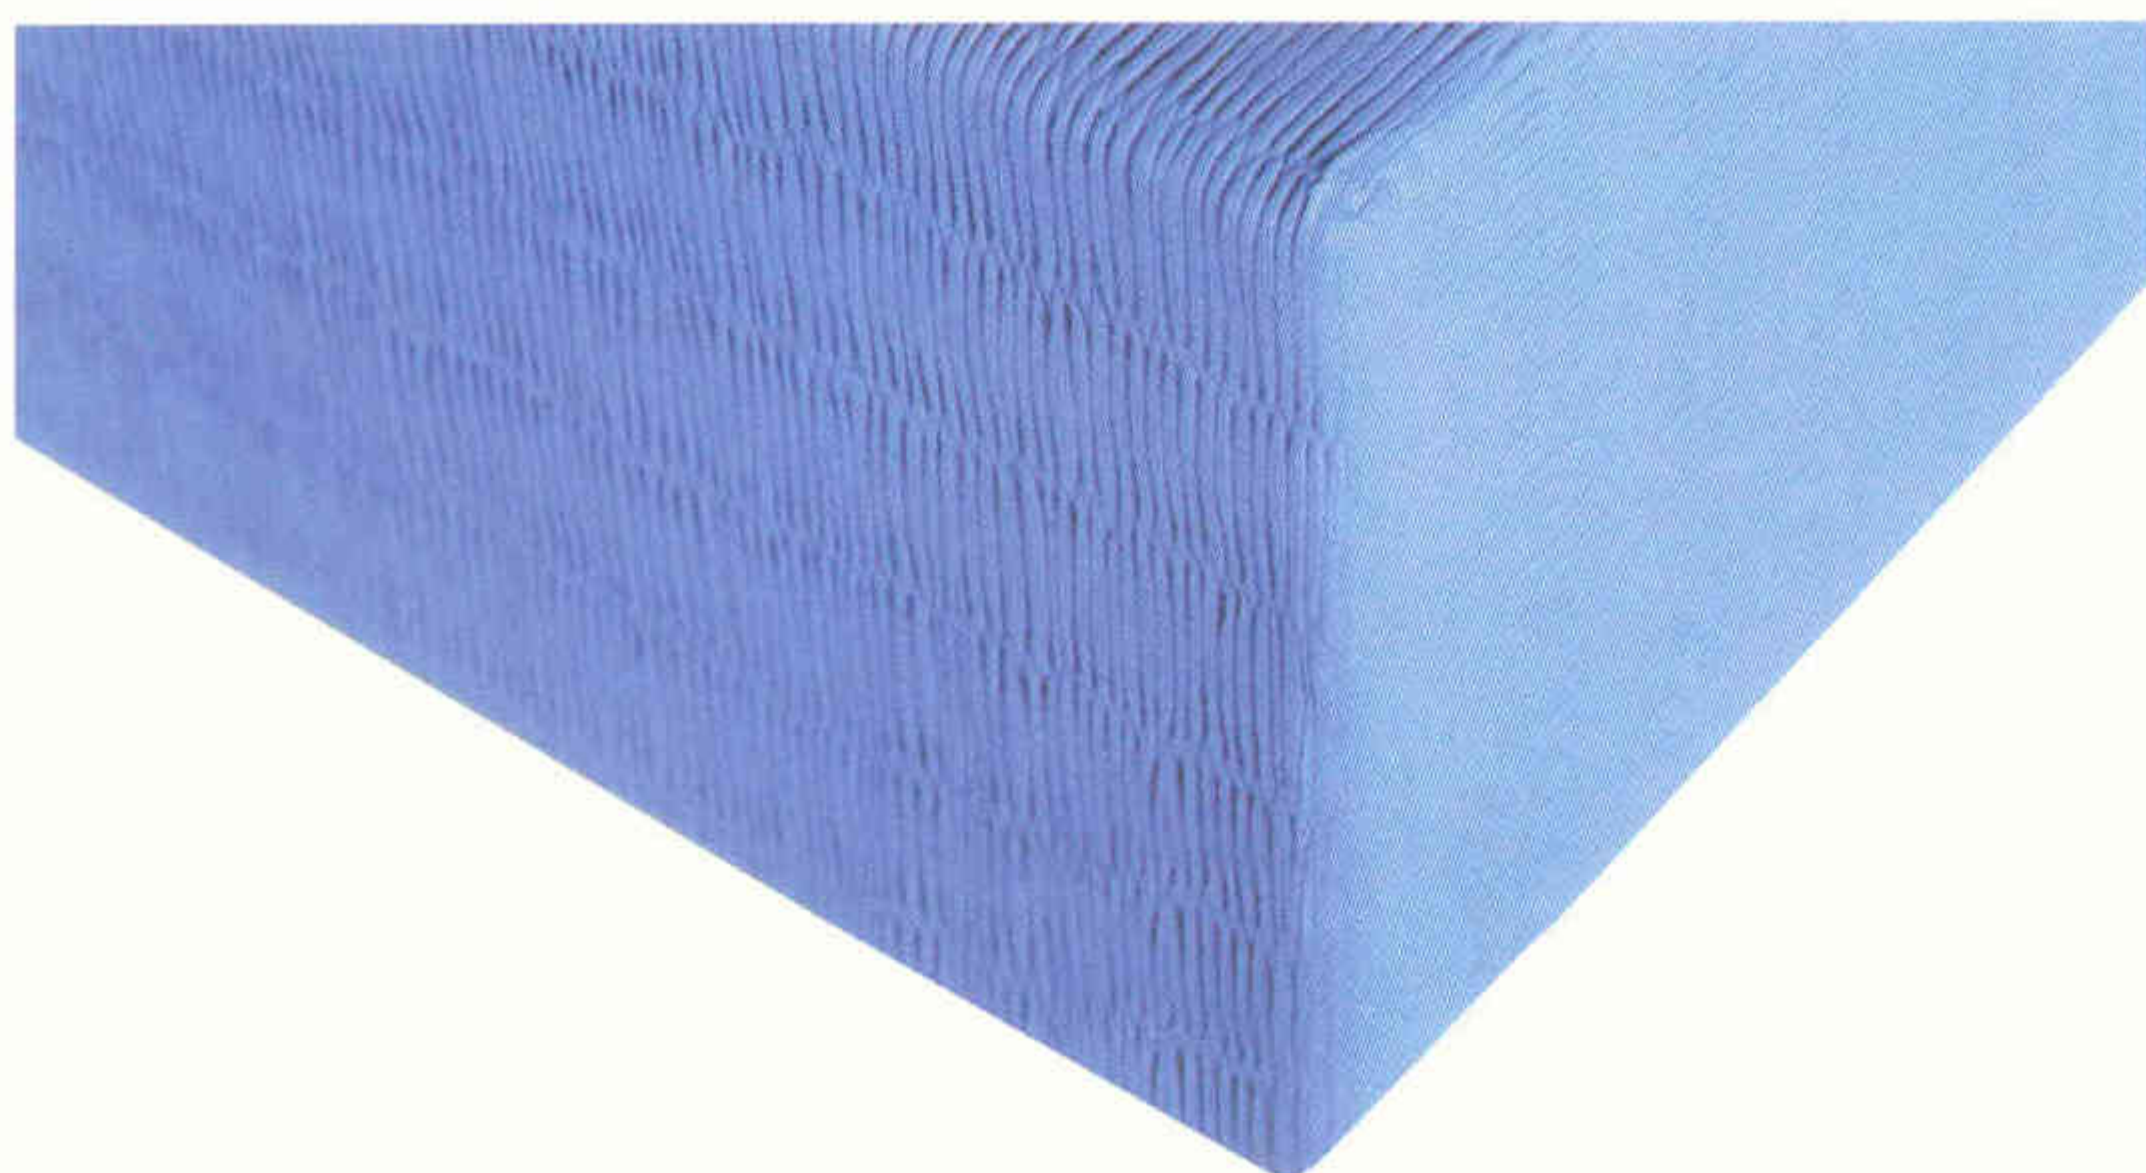

240 kg / m³

Covering Material

BSW Tatami Vinyl and BSW Tatami Anti Slip

BSW Throw Mat

This newly developed throw mat consists of a combination of firm and soft foams. It provides a comfortable and safe base for the professional application of throw and fall techniques. Incorporation into the mat area is easy. Due to its minimal thickness you can fully perform throws and falls without any risk of injury.

Dimensions

2.000 x 1.000 x 80 mm

Quality Mark

E 215 / B 30

Density

240 / 30 kg / m³

Covering Material

BSW Tatami Vinyl and BSW Tatami Anti Slip

Colour

dark-blue
