

Differences between Fitnice® and other manufacturers.

- The whole **Fitnice®** color range are resistant to directly solar light (outdoor). Other manufacturers only have some resistance collections.
- **Fitnice®** fabrics inhibit growth of many bacteria and common fungi. Other manufacturers do not offer information about it.
- **Fitnice®** is labeled with OekoTex certification (free of toxic substances). Other manufacturers do not offer information about it.
- **Fitnice®**, easy cleaning and maintenance. Fitnice has thermo fixed yarns, avoiding the particles dirt inside between the yarns, being suitable to apply directly bleach.
- The Fitnice® yarns are manufactured with a High Tenacity Polyester yarns coated with vinyl totally thermo fixed, giving a high dimensional stability and resistance to the product. Other manufacturers use hollow yarns of PVC.
- Following the last two points, other manufacturers have a “BPS” product after the installation. It is not necessary on **Fitnice®** products.
- The whole **Fitnice®** collections (all color range) are available on stock.

Not in other manufacturers case.

- Other manufacturers have rolls of 25 ml and **Fitnice®** is 20 ml, in consequence are less heavy and easier to handle.
